# PROGRESS OF THE SCIENCE OF THE PHYSIOLOGY OF THE LIVER

BY  
J. H. HARRIS, M.D.,  
Professor of Physiology, University of Chicago

## INTRODUCTION

The liver is one of the most important organs of the body, and its functions are of great importance to the health of the individual. It is the largest organ of the body, and it is the only organ that can regenerate itself. The liver is the only organ that can regenerate itself. The liver is the only organ that can regenerate itself.
